Rotation Matrices

→ 2D Rotation Matrix:

$$R(\theta) = \begin{bmatrix} \cos \theta & -\sin \theta \\ \sin \theta & \cos \theta \end{bmatrix}$$

$$\begin{bmatrix} \chi_2 \end{bmatrix} = R(\theta) \begin{bmatrix} \chi_1 \\ y_2 \end{bmatrix}$$

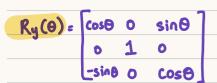

- # Properties of rotation matrix:
- -> Inverue = Transpose
- -> Determinant = 1
- -> Rotation × Rotation = Rotation
- # How to write rotation matrices:

3D:

Set the empty space in the row below 1 as -sino. The rest with sino.

Rotation Matrices for X,7 and Z:

$$R_{x}(\theta) = \begin{bmatrix} 1 & 0 & 0 \\ 0 & \cos \theta & -\sin \theta \\ 0 & \sin \theta & \cos \theta \end{bmatrix}$$

$$\begin{array}{c|cccc}
R_{\overline{z}}(\theta) = \begin{bmatrix}
\cos \theta & -\sin \theta & 0 \\
\sin \theta & \cos \theta & 0
\end{bmatrix}$$

Ex.
$$1 \circ 6 \circ 0$$

$$0 \cos \theta - \sin \theta \circ = Rx(\theta)$$

$$0 \sin \theta \cos \theta \circ 0$$

$$0 \circ 0 \circ 0$$

Forward Kinematics

F.K: finding position & orientation of end effector when we know all the joint parameters.

Transformation of Link 1 w.r.t Base 0:

Transformation = Translation × Rotation

- -> Translation: Link 1 is b units + z wrt Base 0
- -> Rotation: Rotates about joint 1 around 7-axis.

$$TF_{01} = \begin{bmatrix} 1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 0 & 1 & b \\ 0 & 0 & 0 & 1 \end{bmatrix} \begin{bmatrix} \cos \theta_{1} & -\sin \theta_{1} & 0 & 0 \\ \sin \theta_{1} & \cos \theta_{1} & 0 & 0 \\ 0 & 0 & 1 & b \\ 0 & 0 & 0 & 1 \end{bmatrix}$$

· Similarly, we find Tiz, Tzz, Tz, E

T.F of end effector TFOE = TOI x TIZ X TZ3 X TSE

$$TF_{0E} = \begin{bmatrix} C_{1} & -S_{1}C_{2}C_{3} + S_{1}S_{2}S_{3} & S_{1}C_{2}S_{3} + S_{1}S_{2}C_{3} & L_{3}(-S_{1}C_{2}C_{3} + S_{1}S_{2}S_{3}) - S_{1}C_{2}L_{2} \\ S_{1} & C_{1}C_{2}C_{3} - C_{1}S_{2}S_{3} & -C_{1}C_{2}S_{3} - C_{1}S_{2}C_{2} & L_{3}(C_{1}C_{2}C_{3} - C_{1}S_{2}S_{3}) + C_{1}C_{2}L_{2} \\ O & S_{2}C_{3} + C_{2}S_{3} & -S_{2}S_{3} + C_{2}C_{3} & L_{3}(S_{2}C_{3} + C_{2}S_{3} + S_{2}L_{2} + L_{1} + b) \\ O & O & 1 & -C_{1}C_{2}C_{3} + C_{2}C_{3} & C_{1}S_{2}C_{3} + C_{2}C_{3} \end{bmatrix}$$

Opientation of EE

Position of EE

Multiplying transformation matrices of all the joints relative to base gives us the transformation matrix of end-effector w.r.t base.
